

## HAZARDOUS MATERIAL ACCEPTANCE CHARTS

### Classes of Hazardous Materials

There are several types (classes) of Hazardous Materials. Most classes are accepted for transport by Tropical Shipping, but there are classes that, because of their extreme danger, Tropical Shipping does not handle. Below are lists of Hazardous Materials that are and are not accepted/transported by Tropical Shipping.

MATERIALS ACCEPTED BY TROPICAL SHIPPING		
	Hazard Class Name	Corresponding Hazard Class Number
1.	Explosive 1.3 G	Class 1.3 G
2.	Explosive 1.4 G, 1.4 S	Class 1.4 G, 1.4 S
3.	Flammable Gases	Class 2.1
4.	Non-Flammable Gases	Class 2.2
5.	Poison Gases	Class 2.3
6.	Flammable Liquids	Class 3
7.	Flammable Solids	Class 4.1
8.	Spontaneous Combustible	Class 4.2
9.	Dangerous When Wet	Class 4.3
10.	Oxidizers	Class 5.1
11.	Organic Peroxides	Class 5.2
12.	Toxic Substances (Poisons)	Class 6.1
13.	Corrosives	Class 8
14.	Miscellaneous Dangerous Substances	Class 9
15.	Radioactive Material, Excepted Package	**

MATERIALS NOT ACCEPTED BY TROPICAL SHIPPING		
	Hazard Class Name	Corresponding Hazard Class Number
15.	Class A and B Explosives	Class 1.1, 1.2 All compatibility groups Class 1.3,
16.	Class C Explosives	Class 1.4, compatibility groups: A,B,C,D,E,F,H,J,K,L,N
17.	Blasting Agents	Class 1.5, 1.6
18.	Infectious Substances	Class 6.2
19.	Radioactive Materials**	Class 7
20.	Hazardous Waste Materials	

Revised: 07/2015

\*\*We can now accept: UN#s 2908, 2909, 2910 or 2911.

The “**EXCEPTED PACKAGE**” applies to packages that may contain radioactive material in Limited Quantities, instruments, manufactured articles or empty packages and are **only subject to the marking of the UN# on the outside of the package with the words Radioactive Material, Excepted Package.** shipped as general cargo, not as hazardous material.
